

DesignLine

KNIFE LIKE CUTS - GUARANTEED

DESIGNLINE TAPE - 1/8" / 3.5mm wide

- The cut produced will rival a knife or plotter
- Not a wrapping tool, made for designing
- Single layer vinyl applications only
- Create perfect stripes, (curved or straight)
- Designing is easy because the tape turns with ease in any direction
- It's faster. You can break the tape with your hands
- Pulling the filament slowly in tight turns will still give great cuts
- Filament and tape are made to slightly stretch together, works similar to pinstripping.
- 50m rolls (100m rolls available upon special order)

We are so confident in the cut produced we offer a money back guarantee, some restrictions apply.

Knifeless[®] Tech Systems

FINISH LINE TAPE

1/8" / 3.5mm wide

- Conforms and turns easily
- 3M Certified approved installation tool
- Used in many situations while wrapping
- Cuts through multiple layers of vinyl with ease to create an embossed look
- Used to make butt joints
- Great for cutting a sixteenth of an inch on the rubber so you can tuck behind

PERF LINE TAPE

1/4" / 6.4mm wide

- Use to give you a 1/8" gap around the windows for perforated window film
- Also can be used for bridging tight gaps
- Can be used for trimming along rubber mouldings. The vinyl slides off one side of the tape easily into the gap.

BRIDGE LINE TAPE

1/2" / 12.7mm wide

- The most important use for this tape is to bridge gaps between the doors and fenders

50m rolls (100m rolls available upon special order)
